

ARMADA
A-POT SYSTEM

DECEPTION / PRODUCT OVERVIEW

Deception. Threat Intelligence.

Controlled deception for modern defenders.
Divert attackers away from real assets.
Capture behavior, tools and indicators in real time.

SOME ATTACKS
SHOULD NOT REACH
YOUR REAL ASSETS.

READY**

Deploy believable decoys

Expose decoy hosts, services and credentials that attract reconnaissance, brute force and lateral movement.

See what attackers do

Track sessions, commands, payloads and interaction paths. Convert activity into actionable IoCs and threat insights.

Feed your defense stack

Stream findings into ARMADA NextGen SIEM, CTI workflows and response playbooks for faster detection.

Stay isolated and safe

Use segmented deception environments and controlled interaction to study intrusions without risking production assets.

ENGINEERED FOR DECEPTION

Service emulation / Session capture / Behavioral analytics / IoC extraction

DEPLOYMENT

Pilot-ready

On-prem or private cloud
Rapid rollout for deception use cases
Scalable sensor placement

ARMADA ADVANTAGE

Actionable attacker intelligence

High-fidelity deception
Integrated with SOC and CTI operations
Built for detection, research and response.
